DishTemp® Dishwasher Thermometer (810-280)

DishTemp dishwashing thermometer

- Simulates maximum plate surface temperatures
- Cost-effective, reusable thermometer
- More accurate dishwasher checks
- Waterproof to IP66
- Ideal for HACCP compliance
- Free traceable calibration certificate

Product specifications

Accuracy	±0.5 °C
Battery	CR2032
Battery Life	5,000 Hours
Battery Quantity	1
Battery Weight	2.4
C/F Switchable	✓
Calibration Included	Traceable
Case Material	ABS Plastic
Guarantee	1 Year
IP Rating	IP66
Low Battery Indication	✓
Packaged Weight (g)	147
Product Dimensions	ø127 x 14mm
Product Weight	123
Range	0° to 90°C
Reese's Law Battery Warning	✓
Resolution	0.1
Sensor Type	Thermistor

The DishTemp thermometer eliminates the need for costly and inaccurate test strips and stem thermometers that don't stay in place and won't record the temperature at the plate surface.

Built to survive daily use in professional kitchens, the DishTemp dishwasher thermometer indicates temperature over the range of 0 to 90 °C with a resolution of 0.1 °C/°F and an accuracy of ±0.5 °C.

Incorporating a durable water-tight seal, the DishTemp is waterproof to IP66 and is supplied complete with a free traceable certificate of calibration, calibrated at one point only (71 °C) .
